

Upload your project proposal here as a PDF. Be sure to include the names of all members of your team (including yourself), and a short description of your proposed project. Each member of your team needs to upload a copy (which will be identical for each member of the team).

Members: Lissie Chin, Chamee Vang

Proposal:

Pitch #1: We want to make a choose your own adventure game with mini-challenges the player(s?) has to win before moving on in the adventure.

The display screen will have text that appears (the story) and once the player(s) reach one of the multiple games another screen will appear for them to complete the challenge and move on in the game

Some of the games may be hangman, maze(?), a battle game(?)

Hangman class

- Len of words (levels)
- Adding on the body parts
- Tries
- Timer(?)
- True or false (if the letter is in the word)
 - Or return try again, the letter has been said

Maze class

- size
- Color of maze
- Score
- Time

Math game

Python classes

- Math, string, random, boolean, Lists
